Lansing: 1962

FOREWORD

The primary responsibility of the Archives is one of preserving the permanently valuable records of the State. Analysis description and the creation of finding aids is a vital part of our work. Narrative inventories, special lists and various kinds of aids facilitate the use of these records.

Each finding aid contains an introduction briefly outlining the history and functions of the agency that accumulated the records. The records are described by series, that is, by units of records of the same form or that deal with the same subject or activity or that are arranged serially. Additional significant information about the records may be given in appendixes.

Lists of permanent records of all units of Michigan government from 1797 are issued periodically. A brochure, Introducing the Michigan Historical Commission Archives (revision in process), was issued in 1959. A Guide to Photographic Resources in the Michigan Historical Commission Archives was produced in 1960 (out of print).

Introduction

The records in this record group consist of manuscript and published maps accumulated by the Lands Division of the Michigan Department of Conservation. They are in the form of manuscript drawings, printed maps, tracings, blueprints, cross sections, profiles, and manuscript field sheets. The overall dates given in the series title are based upon dates of individual maps and are obtained in a variety of ways. One map may show when it was compiled, another when the information was annotated on it, another when it was certified, and still another when the copy at hand was made. Approximate dates could be obtained for others from related textual records.

All the maps were rolled when they arrived at the Archives, and were stored one on top of the other in cardboard containers. Some of the items had kraft paper covering; others did not. Each map was numbered. This number will serve as a permanent identification number corresponding to numbers listed on the transmittal form.

Since their transfer to the Archives the maps have been removed from their dirty covering, unrolled, cleaned of loose dirt, steam pressed, and a control card established for each item reporting the subject, title, surveyor or draftsman, date, size, scale, identification number, and special features. Duplication of cards was avoided by using the transmittal form as a serial list. A 3" x 5" card index file with cross references has been arranged by subject. Numbers referring to description in Louis Karpinski's BIBLIOGRAPHY OF THE PRINTED MAPS OF MICHIGAN, 1804-1880 (Lansing: Michigan Historical Commission, 1931) are included. Whenever possible these maps have been placed in low-acid content folders and filed flat. Long maps have been re-rolled, re-wrapped, numbered, and placed in outsize containers.

Items described in this finding aid shall be known as Record Group 59-4, Records of the Michigan Department of Conservation, Lands Division, in the Michigan Historical Commission Archives. This list augments List of Cartographic Records of the Department of Conservation, Lands Division, Number 1, and related material in other record groups accumulated by the Department of Conservation.

LIST OF CARTOGRAPHIC RECORDS OF THE LANDS DIVISION,
MICHIGAN DEPARTMENT OF CONSERVATION

Special List No. 2

Boundaries

NORTHERN AND NORTHWESTERN BOUNDARY BETWEEN THE UNITED STATES AND GREAT BRITAIN. 1 item; 10 pieces. No. 01008. 1
